Virus Genes

Volume 6 (1992)
Table of Contents
Number 1

Biophysical and biochemical properties of baculovirus-expressed CaMV P1 protein ..... *A.J. Maule, M. Usmany, I.G. Wilson, G. Boudazin, and J.M. Vlak* 5

Identification and mapping of origins of DNA replication within the DNA sequences of the genome of insect iridescent virus type 6 ..... *M. Handermann, P. Schnitzler, A. Rösen-Wolff, K. Raab, K.-C. Sonntag, and G. Darai* 19

Effects of antisense oligodeoxynucleotide hybridization on in vitro translation of potato virus Y RNA ..... *C. Levis, M. Tronchet, M. Meyer, J. Albouy, and S. Astier-Manifacier* 33

Translation of potato virus S RNA in vitro: Evidence of protein processing ..... *G.D. Foster and P.R. Mills* 47

Effect of changes in the nucleotide sequence of the P gene of respiratory syncytial virus on the electrophoretic mobility of the P protein ..... *C. Caravokyri and C.R. Pringle* 53

Increased production of human immunodeficiency virus (HIV) in HIV-induced syncytia formation: An efficient infection process ..... *M.I.H. Chowdhury, Y. Koyanagi, M. Suzuki, S. Kobayashi, K. Yamaguchi, and N. Yamamoto* 63

Computer predictions of functional, topogenic, and antigenic domains in human immunodeficiency virus-2 envelope glycoprotein ..... *Y. Becker* 79

Conservation of amino-acid sequence motifs in lentivirus Vif proteins ..... *M.S. Oberste and M.A. Gonda* 95

Number 2

Simian virus 40 mutants with amino-acid substitutions near the amino terminus of large T antigen ..... *K.W.C. Peden and J.M. Pipas* 107

Development of a supersensitive polymerase chain reaction method for human T lymphotropic virus type II (HTLV-II) and detection of HTLV-II proviral DNA from blood donors in Japan ..... *T. Hamakado, T. Matsumoto, Y. Koyanagi, K. Hayashi, K. Fukada, T. Kouchiyama, T. Yoshida, and N. Yamamoto* 119

Computer prediction of antigenic and topogenic domains in HSV-1 and HSV-2 glycoprotein B (gB) ..... *Y. Becker* 131

Tombusvirus genome may encode the sixth small protein near its 3′ terminus ..... *V.P. Boyko and A.V. Karasev* 143

The complete nucleotide sequence of a variant of coxsackievirus A24, an agent causing acute hemorrhagic conjunctivitis .....
K. Supanaranond, N. Takeda, and S. Yamazaki 149

Rapid, sensitive, specific, and quantitative detection of human T-cell leukemia virus type I sequence in peripheral blood mononuclear cells by an improved polymerase chain reaction method with nested primers .....
Y. Aono, J. Imai, K. Tominaga, S. Orita, A. Sato, and H. Igarashi 159

Hepatitis E virus (HEV): Strain variation in the nonstructural gene region encoding consensus motifs for an RNA-dependent RNA polymerase and an ATP/GTP binding site ..... *K.E. Fry, A.W. Tam, M.M. Smith, J.P. Kim, K.-C. Luk, L.M. Young, M. Piatak, R.A. Feldman, K.Y. Yun, M.A. Purdy, K.A. McCaustland, D.W. Bradley, and G.R. Reyes* 173

Evolution of thymidine and thymidylate kinases: The possibility of independent capture of TK genes by different groups of viruses .....
E.V. Koonin and T.G. Senkevich 187

Amino-acid sequence comparison of nepovirus coat proteins .....
H. Steinkellner, G. Himmler, R. Sagl, D. Mattanovich, and H. Katinger 197

Report on the Federation of European Biochemical Societies Course on The Plant Virus Genome: Structure and Function ..... *R. Hull* 203

Number 3

Editorial ..... *Y. Becker* 211

The 3′-nucleotide sequence of an ordinary strain of potato virus S ..... *G.D. Foster and P.R. Mills* 213

Human oocytes express murine retroviral equivalents ... *B.O. Nilsson, P.-O. Kättström, P. Sundström, P. Jacquemin, and E. Larsson* 221

Expression of biologically active HIV glycoproteins using a T7 RNA polymerase-based eucaryotic vector system ..... *T. Wilk, H. Mierswa, H.-G. Kräusslich, J.J. Dunn, and V. Bosch* 229

Genetic mechanisms of antigenic variation in infectious bursal disease virus: Analysis of a naturally occurring variant virus ..... *D.P. Lana, C.E. Beisel, and R.F. Silva* 247

Multiple *cis*-acting DNA elements that regulate transcription of the adenovirus 12 *E1A* gene ..... *Y. Yamazaki, Y. Shimada, H. Shibata-Sakurai, Y. Masamune, and Y. Nakanishi* 261

Neutralizing monoclonal antibodies against α and β subunits of the *Ustilago maydis* virus encoded toxin ..... *I. Ginzberg, S. Rosenblum, Y. Koltin, and N.I. Smorodinsky* 273

Quantitative assessment of poxvirus promoters in fowlpox and vaccinia virus recombinants ..... *D.B. Boyle* 281

A HSV-1 variant (1720) generates four equimolar isomers despite a 9200-bp deletion from TR_L and sequences between 9200 np and 97,000 np in inverted orientation being covalently bound to sequences 94,000–126,372 np ..... *J. Harland and S.M. Brown* 291

Overexpression and purification of enzymatically active recombinant integrase protein of Rous sarcoma virus ..... *I. Marczinovits, J. Molnár, J. Sóki, and I. Fodor* 301

Nucleotide and deduced amino acid sequence of the canine adenovirus type 1 proteinase ..... *F. Cai and J.M. Weber* 307

Number 4

Editorial ..... *Y. Becker* 317

Computer analysis of the amino acid sequences in gp41 of apathogenic African green monkey (AGM) virus, less pathogenic HIV-2 and highly pathogenic SIV and HIV-1 lentiviruses ..... *Y. Becker* 319

Characterization of the third origin of DNA replication of the genome of insect iridescent virus type 6 ..... *K.-C. Sonntag and G. Darai* 333

Comparative sequence analysis and expression of bovine PrP gene in mouse L-929 cells ..... *J. Yoshimoto, T. Iinuma, N. Ishiguro, M. Horiuchi, M. Imamura, and M. Shinagawa* 343

The presence of antibodies to purified $p24^{gag}$ protein of HTLV-I in sera of patients with systemic lupus erythematosus (SLE) ..... *J. Higashi, S. Kumagai, M. Hatanaka, and H. Imura* 357

Sequence determination and genetic content of an 8.9-kb restriction fragment in the short unique region and the internal inverted repeat of Marek's disease virus type 1 DNA ..... *M. Sakaguchi, T. Urakawa, Y. Hirayama, N. Miki, M. Yamamoto, and K. Hirai* 365

Transient expression assay in a baculovirus system using firefly luciferase gene as a reporter ..... *T.N. Kopylova-Sviridova, V.I. Krauzova, T.M. Timiryasova, T.V. Gorelova, N.G. Shuppe, and I. Fodor* 379

Nucleotide sequence of the genome segment encoding nonstructural protein NS1 of bluetongue virus serotype 20 from Australia ..... *J.A. Cowley* 387

Nucleotide sequence of the cDNA for porcine rotavirus VP7 gene (strain K) ..... *T.A. Akopian, V.G. Lunin, V.A. Kruglyak, G.G. Ruchadze, V.I. Bakhutashvili, B.S. Naroditsky, and T.I. Tichonenko* 393
